

SAUDI AMERICAN GLASS COMPANY

SAUDI AMERICAN GLASS COMPANY (SAGCO) was established in 1978 and has, through diligent investment and expansion, becomes the largest and best equipped supplier of processed architectural glass in the Middle East.

SAGCO has gained a solid reputation as a reliable manufacturer of world class quality, conforming to all relevant national and international standards.

We are widely consulted by property developers, architects, engineers and contractors as the first-choice source of high performance glass for virtually all glazing applications.

SAGCO's Architectural Technical Services department will undertake reviews of glass and glazing systems, including analysis of thermal stress, wind loading, glass deflection, acoustic and thermal insulation, spectrophotometric performance and security threat levels.

Our continual investment in the latest equipment; in training and in the quality of our people enhances our capabilities to meet the demands and challenges of new technology.
